LISTING OF THE CLAIMS

Claims 1-6 (Canceled)

Claim 7 (Original): A facility control system comprising control units each of which controls devices and includes: a general output section to which the devices are connected; a memory storing a plurality of control patterns for controlling the devices; and a control pattern selector selecting any of the control patterns for controlling devices.

Claim 8 (Original): The facility control system of Claim 7 further comprising a general input section to which optional devices are connected, wherein the control pattern selector selects any of the control patterns for first devices connected to the general output section, and the control unit controls second devices connected thereto in accordance with control patterns selected in response to signals received from the devices connected to the general input section.
